

SHEET METAL INDUSTRIES 1983 INDEX

JANUARY TO DECEMBER, VOLUME 60

A

A technical and financial appraisal of NC laser machines in a profile cutting application	238
Abrasive belt deburring technology	296
Activity at a low ebb	441
Advanced development and production of punching systems	152
Advanced NDT system for predicting roll defects in rolling mills	592
Advanced tool materials in the drawing of metals	635
Advances in automation — highlights of some exhibits at the Automan 83 Exhibition	216
Advances in volume presswork	359
Aluminium alloys, Explosive hardening of	418
Aluminium components for tomorrow's cars and trucks	497
Aluminium in the early eighties, Sheet	405
Aluminium, Roll cladding of copper on	300
Aluminium strip coating plant, Versatile new	417
Aluminium, Tin electrolytes for colouring anodised	538
An overview of steel storage and handling	562
Automan 83 Exhibition, Advances in automation — highlights of some exhibits at the	216
Automatic tool change system for car component production	93
Automobile assembly using advanced fasteners	233

B

Body panel production, Modern methods for	161
Bonding by epoxy resin adhesives, Fabrication of structures using	173
BCPA News	357
BISPA Review	567
Brazing for the medical world, Modern	583
Bulge forming of hollow-ware	111
Bulge forming processes, Differential gear casings for automobiles by liquid	181

C

CAD/CAM as an aid to sheet metalwork	327
CNC and plasma arc profiling revolutionise fabricating technology	453
CNC laser profiling machine, Company invests in	53
CNC press, Sports car production costs cut by	531
Chemical vapour deposition makes strong impact on tool and die users	303
Coated coil materials in the automotive industry, Use of	516
Coating plant, Versatile new aluminium strip	417
Coil and sheet transfer, Equipment for	576
Coil coated steel, towards a concerted strategy, The future for	435
Coil coating industry, Swedish	617
Coil feeding, Principles of	674
Coil processors' gas bill, Cutting the	45
Coiled material, Freely programmable NC cutting centre with stacker for blanks of all sizes from	295
Coils, Service centre meets demand for thin gauge slit	225
Company invests in CNC laser profiling machine	53
Comparison of lubrication systems	461
Comparison of plastic anisotropy parameters for polycrystalline metals	594
Competitive production of power presses	334
Computer aided design and manufacture of roll forms	655
Computer integrated manufacture, Towards	646

Computers aid high technology manufacturing	509
Copper on aluminium, Roll cladding of	300
Corrosion resistance of zinc and zinc aluminium alloy coatings	506
Cut-to-length line, Stockholder modernises	210
Cutting the coil processors' gas bill	45

D

Deburring technology, Abrasive belt	296
Deep drawing and ironing, Hydraulic presses for	460
Deep drawing characteristics, Dual phase steels	502
Deep-drawing, Small- to medium-series production by	96
Developments in protection masks aid production	112
Developments in the Spanish press industry	81
Die users, Chemical vapour deposition makes strong impact on tool and	303
Differential gear casings for automobiles by liquid bulge forming processes	181, 220
Drawing of metals, Advanced tool materials in the	635
Dual phase steels deep drawing characteristics	502

E

ECCA Review	617
Eighty and still a step ahead (Pratt Brothers)	266
Electronic and hydraulic control systems for metalworking presses, Modern	473
Electronic components, Production of	339
Engineering strains in large pressings	288
Epoxy resin adhesives, Fabrication of structures using bonding by	173
Equipment for coil and sheet transfer	576
Exhibition preview, 5 EMO — New machine tool technology on show	268
Explosive hardening of aluminium alloys	418

F

Fabrication of structures using bonding by epoxy resin adhesives	173
Fasteners, Automobile assembly using advanced	233
Fastener development for future requirements	476
Ferritic stainless steel sheet, Weldability of 18%Cr, 2%Mo	28
5 EMO — New machine tool technology on show	268
Flat steel products, Independent producers of	567
Forming diagrams for axisymmetric sheet metal forming by spinning	264
Formula stainless improves washing machine design and production	20
Freely programmable NC cutting centre with stacker for blanks of all sizes from coiled material	295

G

Gear casings, for automobiles by liquid bulge forming processes, Differential	181
General review of European welding, A	515

H

High pressure manufacture of aircraft components	641
High productivity line for new generation of washing machines and dryers	201
High speed telecentric scanner	580
Hospital equipment from individual instruments to complete hospital projects, Sheet metal for	584

Hydraulic control systems for metalworking presses, Modern electronic and	473
Hydraulic presses for deep drawing and ironing	460
Hydraulic presses for second operation	384

I

In search of safety	678
Independent producers of flat steel products	567
Industrial robots in sheet metal presswork	213
Institute of Sheet Metal Engineering	18, 80, 132, 200, 260, 325, 380, 434, 496, 561, 613, 673
Investing in presswork productivity (Cabrit)	281

L

Laser machines in a profile cutting application, A technical and financial appraisal of NC	238
Laser profiling machine, Company invests in CNC	53
Last words	64, 120, 188, 248, 308, 368, 424, 480, 544, 600, 660, 706
Liquid bulge forming processes, Differential gear casings for automobiles by	181, 220
Lubrication for modern power presses	364
Lubricant for sheet metal forming, Selecting the right	363
Lubrication systems, Comparison of	461

M

Machine tool technology on show, 5 EMO	268
Maestro — body production and finishing	133
Manufacturing system keeps standards high	413
Materials preparation and processing	54, 107
Mechanical presses, Specialised production of (Hubert-Juy-Legros)	285
Mechanised equipment for vessel manufacture	114
Metal spinning enters the robot age	147
Metalcutting, Techniques for faster and accurate	456
Metalworking, Power tools for mobile	471
Metalworking press, Modern electronic and hydraulic control systems for	473
Micro, Pressbrakes — moving with the	343
Microcomputers in job cost estimating, Use of	524
Missed opportunities?	451
Missed opportunities? A look at the provision of Technician Engineers and Engineering Technicians	451
Modern brazing for the medical world	583
Modern electronic and hydraulic control systems for metalworking presses	473
Modern methods for body panel production	161
Modern production of steelworkers	88
Multi-punch operation with unit tooling	165

N

NC cutting centre with stacker for blanks of all sizes from coiled material, Freely programmable	295
NC laser machines in a profile cutting application, A technical and financial appraisal of	238
NDT system for predicting roll defects in rolling mills, Advanced	592
New press boosts output of £1 coins	591
News Review	4, 67, 123, 191, 251, 311, 371, 427, 483, 547, 603, 662

P

Plant and Processes	49, 104, 169, 229
Plasma arc profiling revolutionise fabricating technology, CNC and	453

Polycrystalline metals, Comparison of plastic anisotropy parameters for	594	Rolling mills, Advanced NDT system for predicting roll defects in	592	Strengthening the case for stainless	27
Power presses, Competitive production of	334	S		Swedish coil coating industry	617
Power presses, Lubrication for modern	364	Scanner, High speed telecentric	580	T	
Power tools for mobile metalworking	471	Selecting the right lubricant for sheet metal forming	363	Techniques for faster and accurate metalcutting	456
Preparing for the future	449	Self-determining system for batch shearing	444	The future for coil coated steel, towards a concerted strategy	435
Press boosts output of £1 coins, New	591	Service centre meets demand for thin gauge slit coils	225	Thin gauge slit coils, Service centre meets demand for	225
Press feeding equipment review	692	Shear reduces bow, Rolling cut	101	Tin electrolytes for colouring anodised aluminium	538
Press production, Unification of	410	Shearing, Self-determining system for batch	444	Tool and die users, Chemical vapour deposition makes strong impact on	303
Press robot with long reach	409	Sheet aluminium in the early eighties	405	Tool change press, Quick	382
Pressbrake boosts parts throughput	333	Sheet for optimal formability, The processing of	344	Tool change system for car component production, Automatic	93
Pressbrakes — moving with the micro	343	Sheet metal for hospital equipment from individual instruments to complete hospital projects	584	Total manufacturing package, A	385
Presses for improved productivity, Purpose-built	361	Sheet metal forming by spinning, Forming diagrams for axisymmetric	264	Towards computer integrated manufacture	646
Pressings, Engineering strains in large	288	Sheet metal presswork, Industrial robots in	213	Trends in roll forming	38
Pressings in medical devices, Stainless steel	37	Sheet metal testing machine for teaching and research	467	U	
Presswork, Advances in volume	359	Sheet metal work, CAD/CAM as an aid to	327	Unification of press production	410
Presswork productivity, Investing in (Cabrit)	281	Sheet transfer, Equipment for coil and	576	Unit tooling, Multi-punch operation with	165
Principles of coil feeding	674	Small businesses — the hope for the future?	261	US stampers face uncertain future	443
Processing of sheet for optimal formability	344	Small- to medium-series production by deep-drawing	96	Use of coated coil materials in the automotive industry	516
Production of electronic components	339	Spanish press industry, Developments in the	81	Use of microcomputers in job cost estimating	524
Production more stable but outlook uncertain	686	Specialised production of mechanical presses (Hubert-Juy-Legros)	285	Used machinery can make economic sense	697
Products and Processes	304, 352, 414, 532, 585, 650, 701	Spinning enters the robot age, Metal	147	Used machinery can make economic sense	697
Profile cutting application, A technical and financial appraisal of NC laser machines in a	238	Spinning, Forming diagrams for axisymmetric sheet metal forming by	264	V	
Profiling centre helps improve productivity	58	Sports car production costs cut by CNC press	531	Versatile new aluminium strip coating plant	417
Protection masks aid production, Developments in	112	Stainless improves washing machine design and production, Formula	20	Vessel manufacture, Mechanised equipment for	114
Punching systems, Advanced development and production of	152	Stainless steel pressings in medical devices	37	W	
Purpose-built presses for improved productivity	361	Stainless steel sheet, Weldability of 18% Cr, 2% Mo ferritic	28	Washing machines and dryers, High productivity line for new generation of	201
Q		Stainless, Strengthening the case for	27	Weldability of 18% Cr, 2% Mo ferritic stainless steel sheet	28
Quick tool change press	382	Stampers face uncertain future, US	443	Weldex in prospect	388
R		Steel storage and handling, An overview of	562	Welding, A general review of European	515
Roll cladding of copper on aluminium	300	Steelworkers, Modern production of	88	West Midlands survey	686
Roll forming, Trends in	38	Stockholder modernises cut-to-length line	210	Z	
Roll forms, Computer aided design and manufacture of	655	Storage and handling, An overview of steel	562	Zinc and zinc aluminium alloy coatings, Corrosion resistance of	506
Rolling cut shear reduces bow	101	Index to authors:		R
